

Domino effect

I light a spark and you feed the flame
The whole world's on fire
I say a word, then you say the same
Now we're all in the choir

And one thing's for sure
Still ain't a cure
To defeat the human chain
Truth is, my friend
It will never end
It's been like this before

**The story goes on
They fall one by one
Trying' to stand but the game's just begun
From the first one in line
To the last in no time
And it seems there's no way to reject
The domino effect**

News travels fast, like words on the street
We're tearing walls down
So easy to affect, we tend to believe
What might come around

And one thing's for sure
Still ain't a cure
And there's nothing you can do
Truth is, my friend
It will never end
And it's been like this before

**The story goes on
They fall one by one
Trying' to stand but the game's just begun
From the first one in line
To the last in no time
And it seems there's no way to reject
The domino effect**

The domino effect.....
