

Come alive

I'm no angel, I'm no sinner
Just an ordinary man
And I try to live my life the best I can

When the night is taking over
There's a place I want to be
Where the rhythm is the flesh for fantasy

**I come alive, come alive, come alive
Keep the good times rollin'**

Could it be love, could it be love now
Could it be love, could it be love now

**I come alive, come alive, come alive
When you dance the night away
The only thing that gets me through the day**

You got moves that make me shiver
I'm about to loose control
You fill my hunger, body heart and soul

And my world is dressed in velvet
It's filled with neon light
No, I don't mind another sleepless night

**I come alive, come alive, come alive
Keep the good times rollin'**

Could it be love, could it be love now
Could it be love, could it be love now

**I come alive, come alive, come alive
When you dance the night away
The only thing that gets me through the day**
