

## **Come along**

Let me tell ya that you're half way there  
That you got more than a friend to share  
Believe me  
We can set the night on fire

So these are words coming straight from the heart  
You're strong enough for a brand new start  
Believe me  
Rising to the sun and higher

Don't you let your head down  
Take a chance and make it allright  
Get yourself a future  
You can make it as bright as the light

Come along, get alive  
Come along, take a ride  
There's a world outside  
And it's waiting just for you...  
Come along, get alive  
Come along, take a ride  
Find the hope inside  
And keep it there for you

It may be hard but it's feelin' right  
Never worry when i'm out of sight  
Believe me  
We can make the world go round

When you listen to the beat of my heart  
And when you step right into the dark  
Believe me  
There is more light to be found
